Any other comments for the pathway *Goals of Care — Early Conversations to Have?*

I felt that this pathway required more direction and didn't deliver its subject matter with the appropriate weight and gravity that it deserved.

Any other comments for the pathway *Teaching and Learning in Medical Education — Rote, Recall, Regurgitate, Rinse, Repeat?*

Had to use ChatGPT to help navigate this subject, I'm not proud of it. I would rather sail the seven seas than memorise all of those useless mnemonics!

How difficult did you find the pathway *Practising Ethical Medicine in the Modern Age?*

Any other comments for the pathway *Practising Ethical Medicine in the Modern Age?*

I thought this pathway would be more abstract in its discussion of the pillars of ethics — I certainly didn't expect literal, three-dimensional, marble pillars appearing in this pathway!

How difficult did you find the pathway *Advances in Cancer Treatment*?

Any other comments for the pathway *Neurological Impairment — The Hidden Barrier to Communication*?

I thought the first subject was clinically irrelevant, the second subject was lacking in substance, the third subject was literally the worst, the fourth subject was a swing and a miss, and the fifth subject was a bit of a nothing subject.

Any other comments for the pathway *Advances in Cancer Treatment*?

I reckon you could find a faster cure for cancer with some backyard scientist off Fiverr than through the subjects in this pathway!
